Are your students performing as well as they hope and expect to in your course? Are your students reading the text before they come to class? Meet PsychSmart 2e from McGraw-Hill! PsychSmart is a member of the McGraw-Hill M Series family. . . and the M Series started with YOUR students. Through extensive student research, we have created a textbook and learning system designed to meet the needs and maximize the workflow habits of today's college students. Students told us they wanted a briefer text with more visual appeal...and a less expensive price. We listened. We also listened to instructors. We learned about the challenges that they faced in their classrooms every day and what their ideal course materials would look like. They told us they needed an engaging solution for their course needs - but without sacrificing quality and content. The result is PsychSmart. Authored by master teachers, PsychSmart uses a wealth of real world examples, media and online interactivities to create a dynamic and engaging learning solution designed to reach today's students. It also includes Connect, the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

This succinct, interdisciplinary introduction to critical reasoning successfully dares students to question their own assumptions and to enlarge their thinking world through the analysis of the most common problems associated with everyday reasoning. The text offers a unique and effective organization: Part I explains the fundamental concepts; Part II describes the most common barriers to critical thinking; Part III offers strategies for overcoming those barriers; Part IV offers a selection of contemporary issues that invite students to practice their skills.
